Aluminum Floating Dock

Aluminum Floating Dock

Aluminum alloy floating dock is made of Marine grade 6061 aluminum alloy, T6 heat treatment and MIG welding. The surface has been scientifically treated to enhance the anti-oxidation ability and anti-corrosion ability of the frame. It has good corrosion resistance and is applicable to rivers, lakes and seas with strong universality.

Floating Solar

Solar floating mounting system, which can greatly save land resources is applied in pools, ponds, reservoirs and other places for photovoltaic power stations. It's easy to install, dismantle and recycle.

Besides, higher power production due to natural cooling effect on panels & cables.
